- 2 - Tools and resources from Civimetro initiative

# Measuring the impact of social ventures

Defining outcomes and impacts and deciding how to measure them

Dr Kerstin Junge, Tavistock Institute of Human Relations

# Topics

- Theory of change and measuring impacts of social ventures
- Defining outcomes and impacts
- Working out how to measure outcomes

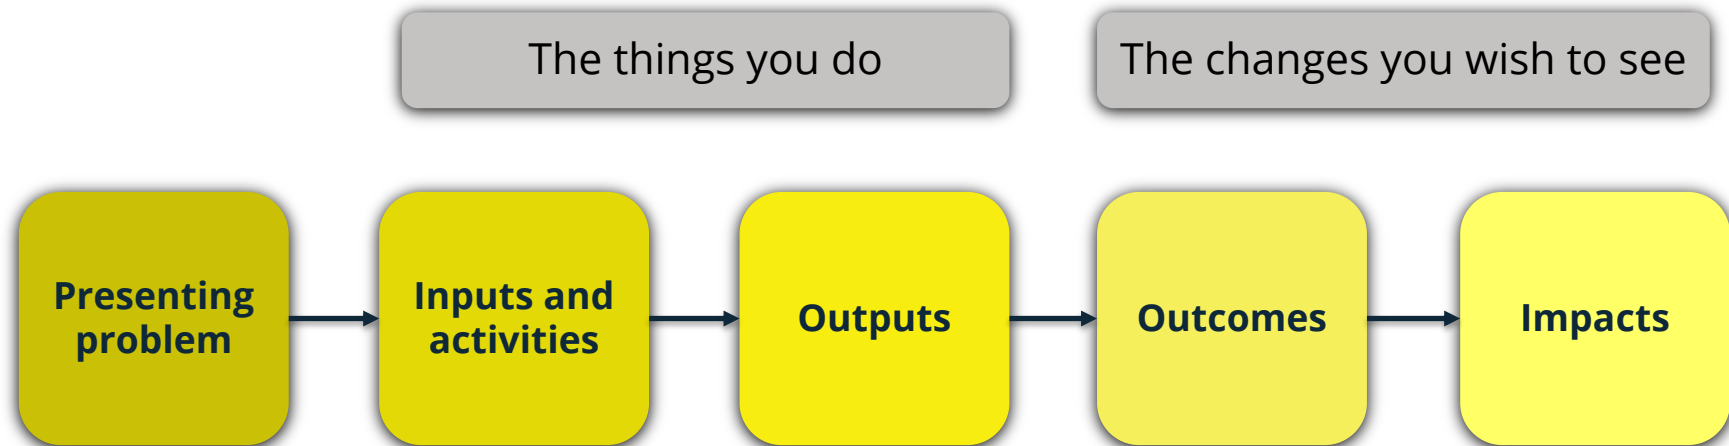

"I think you should be more explicit here in step two."

# Theory of change

*IF we invest these resources and deliver these activities, THEN these outputs will be produced, which will trigger these outcomes and THEN lead to our impact.*

# What are outcomes?

The changes in **values, attitudes, knowledge, skills (immediate outcomes)** and **behaviours (intermediate outcomes)** that result from your project.

For example:

# What are impacts?

The ultimate ambition for a change

This can be a big change

Sustainable management  
of urban reso

For example:

Others will also  
be contributing

Reduction of social  
inclusion

# From defining outcomes to measuring them

What?		How?	When?	Who?	How many?
Outcomes	Indicator	Data sources and how you will collect this	When will the data be collected?	Who will collect it?	What proportion of people
Young people's confidence has improved	YP have improved self-confidence	Survey	At the end of the project	Members of the project team	X% of the young people involved
Stakeholders improve their skills in design thinking	Number of design tools used by stakeholders	Surveys or interviews	At the end of the project	Members of the project team	X% of stakeholders involved in project

# A note on indicators

- An indicator turns an outcome (or impact) into something that can be measured.
- They need to have certain characteristics (e.g SMART, ROARing), in essence be:
  - Relevant / specific
  - Objective / replicable
  - Measurable / available

(see also: <http://www.mnestudies.com/monitoring/qualities-and-characteristics-indicators>)

# Tools inspiration

At the following link, a quite simple tool that links in some ways theory of change to data collection in various section of the website:

<https://www.inspiringimpact.org/self-assessments/data-diagnostic/>

# Civimetro's Tools and resources

**Maje Reig Alberola**

Civic Designer & Architect Project Manager in Carpe

**Pascual Pérez**

Socio cooperativista - cofounder at Oficina de Innovación Cívica S. Coop.
